**UNO® Monolith Ion Exchange Columns**

Order Info: Pg 71

UNO monolith ion exchange columns contain a patented\* continuous-bed matrix, allowing biomolecule separations at high flow rates without sacrificing resolution or capacity.

UNO columns run at low backpressures on the BioLogic DuoFlow™ system or any other medium- to high-pressure chromatography system. A 1 ml UNO column can complete a high-resolution separation in about 3 minutes. UNO columns are also available in 6 and 12 ml sizes.

\* U.S. patent 6,423,666.

The unique homogeneous UNO matrix:

- Has high capacity, even at high flow rates, due to the dense network of nodules that contain the ionic functional groups. These groups are completely accessible to biomolecules via the interconnecting channels
- Has the highest quality and batch-to-batch reproducibility
- Prevents fragmentation, so columns last longer
- Is stable from pH 2 to 12
- Is available for strong anion (Q) and strong cation (S) exchange

**UNO glass columns** — UNO glass columns provide high-resolution separation of biomolecules. The transparent glass

tube allows easy bed inspection and column troubleshooting. Three column sizes provide flexibility for purification protocols.

**UNO replacement columns** — UNO replacement columns provide a simple bed replacement as an alternative to purchasing a new column.

**UNO polishing PEEK columns** — UNO polishing columns, 0.16 ml, are a late-stage purification tool to obtain the highest resolution and recovery from small sample loads. They allow you to purify and concentrate dilute samples in one step.

### Glass Econo-Column® Columns

Order Info: Pg 73

Econo-Column chromatography columns are the standard for high-quality, affordable low-pressure chromatography columns. Columns ranging from 5 to 170 cm in length and 0.5 to 5.0 cm in diameter are available. A porous polymer bed support at the bottom of the column retains fine particles, and translucent polypropylene end fittings allow viewing of the entire column bed. Econo-Column chromatography columns can be autoclaved and are designed to operate at pressures <1 bar (14.7 psi). Econo-Column chromatography columns accept Econo-Column funnels as well as Econo-Column flow adaptors. Econo-Column chromatography columns are now packaged in quantities of 1, 2, and 4, depending on column diameter and length. For convenience, all packaging sizes now contain one stopcock per column ordered.

### Jacketed Econo-Column® Columns

Order Info: Pg 74

Jacketed Econo-Column chromatography columns have an integral water jacket and are ideal for applications that require temperature control, such as thermal chromatography of DNA using hydroxyapatite. A porous polymer bed support at the bottom of the column retains fine particles, and translucent polypropylene end fittings allow viewing of the entire column bed. Jacketed Econo-Column chromatography columns accept Econo-Column funnels and flow adaptors.

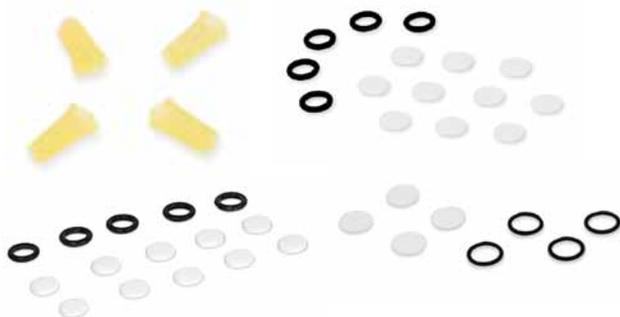

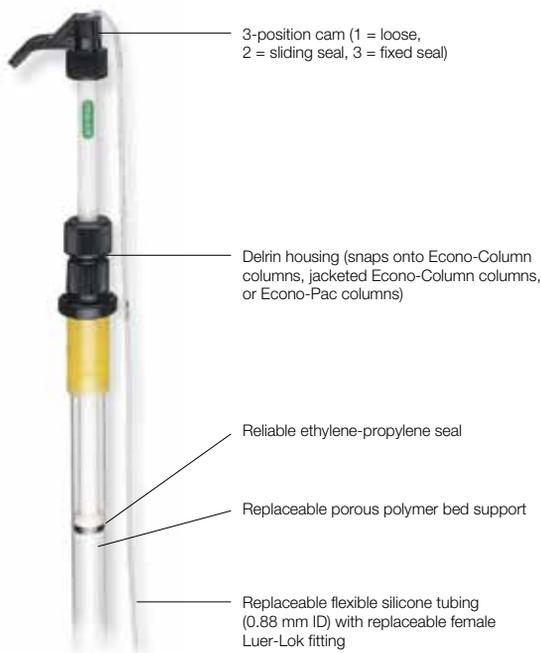

### Econo-Column® Flow Adaptors

Order Info: Pg 75

Flow adaptors significantly improve column performance by eliminating head space above the gel bed and by protecting the column bed from disruption during sample loading.

Flow adaptors improve resolution by delivering buffer and sample directly to the top of the column bed. Flow adaptors are recommended for use with any low-pressure column connected to pumps, the BioLogic™ LP system, or other low-pressure systems.

Econo-Column flow adaptors are available for 1.0, 1.5, 2.5, and 5.0 cm ID Econo-Column chromatography columns (page 67), jacketed Econo-Column chromatography columns (above), and Econo-Pac® columns (page 66). Due to wear and tear of bed supports and O-rings, maintenance kits are available for standard upkeep of flow adaptors.

### Econo-Column® Funnel

Order Info: Pg 75

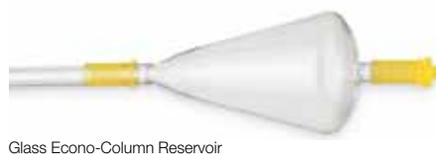

The Econo-Column funnel, constructed of durable polypropylene, is ideal for packing columns, loading diluted samples, or delivering large volumes of buffer. It forms a tight seal with Econo-Column chromatography columns up to 2.5 cm ID (page 67), jacketed Econo-Column chromatography columns (page 68), Poly-Prep® columns (page 67), and Econo-Pac® columns (page 66).

### Glass Econo-Column® Reservoirs

Order Info: Pg 75

Reservoirs are available in 500 ml and 1 L capacities, and will fit 0.5, 0.7, 1.0, or 1.5 cm ID Econo-Column chromatography columns. The four column sizes (2, 5, 10, and 20 ml) allow easy scale-up of separation and purification protocols. The optimized design allows easy packing, bed height adjustment, sample application, and equilibration. Bio-Scale MT columns are convenient for use with BioLogic™ systems or any medium- or high-pressure chromatography system.
